

The fontawesome package

High quality web icons

Xavier Danaux*(\LaTeX code)
Dave Gandy (font and icons design)

Version 4.3.0-1, released on July 10, 2015

Abstract

The `fontawesome` package grants access to 519 web-related icons provided by the included *Font Awesome* free font, designed by Dave Gandy and released¹ under the open SIL Open Font License².

This package works both with \XeTeX and \LuaTeX (using `fontspec` to load the included original otf font), as well as \pdfTeX (using an included `type1` conversion and character mapping of the font).

1 Introduction

The `fontawesome` package aims to enable easy access in \LaTeX to high quality icons covering web application, transportation, gender, file type, spinner, form control, payment, chart, currency, text editor, directional, video player, brand and medical pictograms. It is a redistribution of the free (as in beer) *Font Awesome* font with specific bindings for \LaTeX .

2 Requirements

The `fontawesome` package requires the `fontspec` package when using the \XeTeX or \LuaTeX engines to load the included otf font. When using the \pdfTeX engine, the `fontawesome` package doesn't require any external package.

*E-mail: xdanaux@gmail.com

¹See <http://fontawesome.github.com/Font-Awesome> for more details about the font itself

²Available at <http://scripts.sil.org/OFL>.

3 Usage

`\faicon` Once the fontawesome package loaded, icons can be accessed through the general `\faicon`, which takes as mandatory argument the *<name>* of the desired icon, or through a direct command specific to each icon. The full list of icon designs, names and direct commands are showcased next.

3.1 Web application icons

Icon	Name	Direct command
	<i>adjust</i>	<code>\faAdjust</code>
	<i>adn</i>	<code>\faAdn</code>
	<i>align-center</i>	<code>\faAlignCenter</code>
	<i>align-justify</i>	<code>\faAlignJustify</code>
	<i>align-left</i>	<code>\faAlignLeft</code>
